STOP THE CORPORATE POWER GRAB

Our public services, environment and democracy are under threat from the biggest corporate power grab in a decade.

Behind closed doors, the EU and US are drawing up a dangerous new trade deal called the **Transatlantic Trade and Investment Partnership (TTIP)**.

Shamefully, the UK government is a major supporter of this deal, which would **tighten the grip of big business** over our society. TTIP could:

- Grant **corporations** the power to **sue governments**;
- Lock-in the **privatisation of public services** like the NHS and education;
- **Undermine workers' rights**;
- Undo regulations that protect the environment, giving **harmful industries like fracking** an easier ride;
- Remove food safety regulation to allow new **GM crops**, **hormone pumped beef** and chlorine washed chicken

But together, we can defeat this corporate power grab. Protests are gathering pace across the EU and US. And across the world, countries from South Africa to Ecuador are ripping up agreements like this one.

People across the UK are organising to stop TTIP. Get involved on:
